

# 6kW Quartz Heater Lamp

Vacuum Innovations' 6kW Quartz Heater Lamps are made with electroplated stainless steel to be dependable and practical.

We've put a lot of thought into our designs to avoid warping, allow for quick and easy maintenance, and integrate with your system seamlessly for reliable operation.

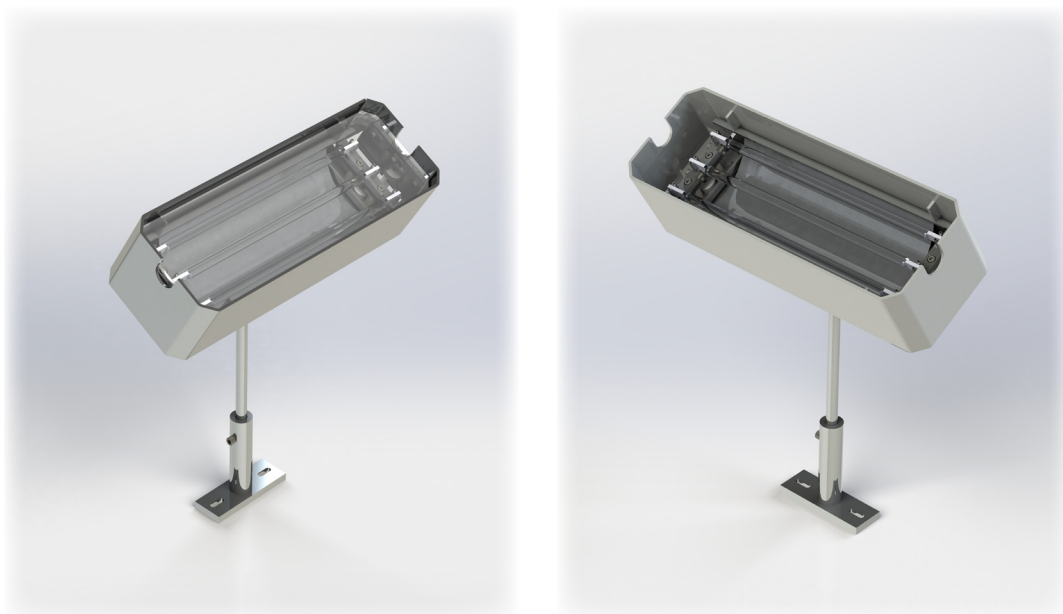

**Better Engineering. Better Performance. Better Results.**

We build advanced equipment, develop layouts, and model processes for precision optical coating systems. We specialize in highly uniform coatings for demanding defense, aerospace, and scientific applications.

## Advanced Design Features & Benefits

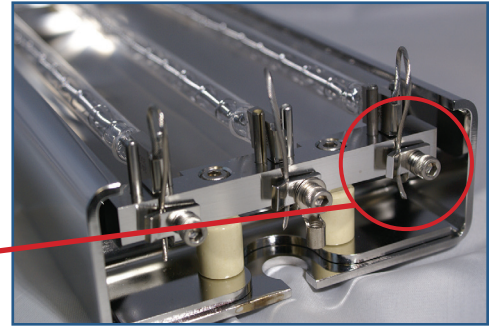

- Lift-off outer housing, for easy cleaning and maintenance
- Individual bulb clamps, for hassle-free bulb changes
- Recessed nuts, to avoid problems resulting from galled or seized screws
- Integrated wire guides and small cross-sectional stands allow for easy integration into your system
- High-temperature, heavy-duty formed reflector and durable glass cover
- Electropolished stainless steel for minimal warping or damage with heavy use

# 6kW Quartz Heater Lamp

Individual bulb clamps allow for quick and easy maintenance – the way it should be. You disturb only the bulb being changed, while the other bulb connections stay secure during replacement.

Integrated wire guides and small cross-section stands make system integration easier.

## Specifications:

- (3) 2kW bulbs
- 240 Volts

## More Products from Vacuum Innovations:

Planetary Rotations • Crystal Heads • Source Shutters  
Resistance Sources • Right Angle Drives • Consulting
